Education

Chittagong University of Engineering & Technology (CUET)

Feb 2020 – Aug 2025

B.Sc. in Computer Science and Engineering | CGPA: 3.14 / 4.00

Technical Skills

Languages	Python, C, C++, JavaScript (ES6+), TypeScript
Frontend	Next.js, React, Tailwind CSS
Backend	Node.js, Express.js (REST API), Stripe
Database	PostgreSQL, MySQL
ORM / Auth	Prisma, JWT, Bcrypt, Better Auth
ML / NLP	XLM-BERT, Transformer-Based Models, Hugging Face
Tools	Git, GitHub, Postman, VS Code

Projects

HealthPlus – Online Medicine Shop Next.js · Express.js · Prisma · PostgreSQL · Stripe · Better Auth [Live](#)

- Built an enterprise-grade e-commerce platform for online medicine purchasing with role-based access control (Customer, Seller, Admin)
- Implemented secure payment processing with Stripe, including order management and invoice generation
- Designed and integrated a RESTful API with JWT-based authentication and Bcrypt password hashing
- Built an admin dashboard for product moderation, seller approvals, and sales analytics

Green Pulse – Community Impact & Challenge Platform Next.js · Express.js · Prisma · PostgreSQL · Recharts [Live](#)

- Developed a full-stack environmental community platform where users join and track eco-challenges
- Built interactive data dashboards using Recharts to visualize user progress and community impact metrics
- Implemented a robust admin panel for challenge management, user activity monitoring, and reporting
- Designed a relational PostgreSQL schema with Prisma ORM supporting complex queries and efficient data access

Thesis & Publication

Paraphrase Detection in Bangla Language [Thesis] Dec 2024 – Jul 2025

- Built a passage-level paraphrase detection model for Bangla using XLM-BERT, achieving **93.4% accuracy**
- Developed and curated a Bangla Paraphrase Dataset of **10,000+ annotated sentence pairs** for NLP research
- Addressed a low-resource language challenge; dataset and model contribute to advancing Bangla NLP benchmarks

CUET's White Walkers @ LT-EDI 2025 [Published]

- Published a transformer-based model for detecting Caste and Migration Hate Speech at LT-EDI 2025 (ACL Workshop)

Achievements

- Solved **350+ problems** on Codeforces — strong algorithmic and competitive programming foundation
- Achieved **3 rating** on CodeChef (Max rating: **1615**), demonstrating consistent competitive performance
- Solved **50+ problems** on LeetCode, focusing on data structures and algorithmic problem solving
